Remote Control SM-50R
Auto learn 3 pushbuttons - Multifrequency

Copy a code from another remote control

To copy a code into SM-50R from another remote control of same type we follow procedure as described below:

1. *Press and hold down simultaneously* ***all 3 buttons*** *until the LED lights continuously* ***(Sm50R is ready for programming)****.*

2. *Release all buttons.*

3. *Place the front side of the remote control that we want to copy, opposite the front side of Sm50R, 4cm apart.*

4. *Pressing and holding down the button of the remote control that we want to copy, we press and hold down the button Sm50R that we want to program.*

5. *When the Remote Control is copied, the* ***LED*** *of* ***SM-50R*** *flashes.*

6. *Release all buttons. SM-50R has been programmed.*

7. *If we fail to perform one of the above steps, then we have to repeat the whole procedure.*
